Volume horaire : 18

Description du contenu de l'enseignement :

This course is based on Interested-based negotiation strategy developed at Harvard University. Whether you will become vice president of a company, a litigator, manager, or human resources director, or someone in sales, negotiation will be central to nearly every part of your professional activity. Systematic and thorough preparation, as well as an ability to manage shared, different, and conflicting interests, is critical to negotiation success. Designed to address the core issues that you will experience as you negotiate on behalf of your clients, organizations, or yourself, this course provides a theoretical framework for thinking about business and managerial negotiations. You will address distinct challenges faced by business professionals - ranging from multi-party, complex negotiations to situations involving difficult people and behaviors - and acquire proven strategies for overcoming them.

The course is divided into 6 sessions each comprising 45 minutes of lecture followed by a practical simulation. The last 30 minutes of each course is dedicated to a debriefing of the simulation as well as a review of the key strategies learned in that session. This course isn't on Moodle.
