

Global Firms in a Fragmented World

ECTS : 3

Volume horaire : 18

Description du contenu de l'enseignement :

This course explores the evolving landscape of globalization through the lens of multinational firms and global value chains (GVCs). It combines analytical insights with real-world case studies to help students understand how firms make strategic decisions about exporting, offshoring, and investing abroad. Key questions include: How do firms decide where to operate globally? What barriers do they face, and how are they changing in today's geopolitically charged world? How are global production networks adapting to rising trade tensions, new technologies, and environmental standards? Throughout the course, students will use both economic concepts and applied examples to analyze the strategies firms use to navigate globalization. Particular attention will be paid to how the global trading system is fragmenting in the post-Trump era with the rise of regionalism, friend-shoring, and shifts in trade policy. By the end of the course, students will be able to critically assess the implications of firm-level globalization strategies for countries, industries, and workers. This course is on Moodle. **1** Globalization then and now: the role of firms in a changing world **2** Who trades with whom, and why? Understanding global trade patterns **3** Where to go global? How firms choose between exporting, offshoring, and FDI **4** Barriers, standards, and the politics of trade **5** Global value chains in a geopolitical age (incl. case-based examples) **6** Final Exam

Compétence à acquérir :

By the end of the course, students will be able to:

- Explain the role of multinational firms and global value chains (GVCs) in the globalization process;
- Analyze how firms make strategic decisions about exporting, offshoring, and foreign investment;
- Evaluate the barriers firms face in global operations and how these barriers evolve in a geopolitically charged environment;
- Assess how global production networks adapt to trade tensions, technological changes, and environmental standards;
- Apply economic concepts and real-world case studies to understand firm-level globalization strategies;
- Critically discuss the fragmentation of the global trading system, including regionalism, friendshoring, and shifts in trade policy;
- Examine the implications of firm-level globalization strategies for countries, industries, and workers;
- Interpret and critique recent empirical evidence on globalization and its impact on welfare.

Mode de contrôle des connaissances :

- The final evaluation is based on a participation (25%) and a final exam (75%).

The numerical grade distribution will dictate the final grade. The passing grade for a course is 10/20. **Attendance** Attendance is mandatory. Students are expected to attend all classes, arrive on time, and stay for the entire session. Repeated absences or lateness may affect the final grade. **Class Participation** Active participation is encouraged, as it contributes to making classes more engaging and instructive. Students are expected to come prepared and contribute thoughtfully to discussions. When participation is part of the course assessment, it is evaluated based on the quality of contributions rather than their quantity. **Exam Policy** Students are not allowed to bring any materials into exams, except those explicitly authorized by the instructor. Unexcused absences from exams or failure to submit assigned cases will result in a grade of zero when calculating final averages. All exams must be submitted at the end of the examination period. **Communication and Grading** All questions or concerns regarding grading or course policies must follow the official procedures. No direct negotiation with instructors about grades or assessments is permitted. Be aware of the rules in Université Paris Dauphine about plagiarism and cheating during exams. All work turned in for this course must be your own work, or that of your own group. Working as part of a group implies that you are an active participant and fully contributed to the output produced by that group.
