Short term Research Master's Thesis

ECTS : 3

Description du contenu de l'enseignement :

The Short-term Master's thesis is partly prepared during the course on research methodology, but most of the work is done under the supervision of Professor of the team.

The purpose of the Short-term Master's thesis is, for the student:

- to anchor an autonomy in learning
- to enhance his or her capacity for innovation
- to provide education through research
- to write an original piece of work, on contemporary questions

The interest of such a work, for the student, is to acquire a distinctive competence on a pecific subject. This specific skill should be an asset for her or his professional career.

Compétence à acquérir :

The aim of the Short-term Research Master's thesis is to produce an original piece of research work on a clearly defined topic within the investigative field of contemporary finance, under the guidance of one of the Master's Professors.

The Short-term Master's thesis is a tool for the students of the M2 104 who intend to find a position in the finance industry. It is a unique opportunity to demonstrate their scientific expertise in the field of finance. Experiance shows that employers highly value this research approach.

Mode de contrôle des connaissances :

The Short-term master's thesis must be send to the supervisor by the End of June, and defended before mid-July. Part of the grade is linked to the assuidity and the quality of the documents realized by the student during the course on research methodology.
